PRICING POLICY

Council has determined these fees & charges in accordance with Section 610D of the *Local Government Act 1993*.

Fees and charges have been classified into the following five categories:-

(1) **BONDS (BOND)** - Price charged is for a refundable bond or damage security deposit required to be paid to Council to ensure specific conditions are fulfilled.

(2) **REGULATED (REG)** - Price charged is regulated by State or Federal Government legislation. In the event of legislation introducing a new or amended statutory/regulatory fee subsequent to adoption of this document, the Council may apply these new charges without further notice.

(3) **FULL COST RECOVERY (FCR)** - Price charged aims to recover all of the direct and indirect costs involved in providing a service.

(4) **PARTIAL COST RECOVERY (PCR)** - Price charged aims to only partially recover the full cost involved in providing a service.

Situations where partial cost recovery may apply include:

- Where benefits from provision of the service accrue to the community as a whole as well as individual users;
- A short-term approach to stimulate demand for a service where charging prices at full price may result in service evasion.

(5) **MARKET COMPETITIVE (MC)** - involves selecting price points based on market competition. Comparatives are made with businesses offering the same or similar services.

A policy code reference is quoted against each fee and charge in relation to the pricing methodology. The predominant consideration in reviewing these fees and charges shall be full cost recovery or market price on a fee for service ("user pays") basis. However, this principle will only be applied where the cost of the service provision can be accurately determined and the end user can be easily identified.

The price of goods and / or products offered for sale at Council events and venues, at the option of the purchaser, where is no compulsion to buy, will be set at cost recovery plus a margin. These prices may vary from time to time.

GOODS & SERVICES TAX (GST)

Fees and charges may include the Goods and Services Tax (GST). GST is a broad-based tax of 10% on the supply of most goods and services consumed in Australia. The impact of GST on fees and charges is where fees attract the GST and this amount has been included and is shown in a separate column.

The following schedule of fees and charges has been prepared in accordance with the *A New Tax System (Goods and Services Tax) Act 1999*. If there is any change to the GST status of any of Council's Goods and Services throughout the year following ATO rulings or any other legislative change, the new GST treatment will be applied immediately to the relevant fees and charges.

ROAD RESTORATION WORKS

NOTE: Where works are performed outside of business hours a 30% surcharge will be added to any fee.

Private Works are Taxable - GST to be added

1. Where works or the like, are not catered for in the above schedule, the appropriate charge be determined on the basis of recovering costs inclusive of overheads. E.g. Restoration involving varied paving and landscape works.

2. At the discretion of the Director Shire Infrastructure, for sites where a development consent has been granted, restoration may be permitted by private contractors where road works are to be carried out as a condition of development consent, upon prepayment of full restoration costs as per schedule and refund of up to 80% of payment dependent upon satisfactory performance.

3. Minimum Restoration Charges at the rate of 1m² will apply for restorations less than 1m² in area.

4. A separate establishment charge will be payable for each day where asphalt paving works are not capable of being completed within a single shift. Prior agreement is to be reached between Council and the proponent as to the number of shifts required to complete the work.

5. The minimum width of road restoration will be the trench width plus 200mm on each side. Note: This applies to transverse crossings not longitudinal restorations. Longitudinal restorations shall extend to the full lane width or full road width where applicable. The extent to be determined by Director Shire Infrastructure.

6. Council uses contract road profiling equipment to trim pavement base course material and to trim the existing asphalt adjacent to disturbed areas ready to receive new asphalt. The cutting width of the profiling equipment is not adjustable and dictates the width of the restoration where the width of the trench is <0.7m (i.e. restoration <1.0m). The finished area of the restoration will be used as the basis for the restoration charge.

7. Where any part of the road opening is within 1m of the lip of a kerb or where no kerb exists, the edge of bitumen, the restoration is to extend to the lip of the kerb or edge of bitumen as the case may be.

8. Where any part of the road opening is within 1m of an existing road restoration, the new restoration is to extend to the far side of the existing restoration.

9. Where any part of a 1.2m wide paved footpath is disturbed, the Road Opening Charge will provide for replacement of the full width of the footpath.

10. Trench Backfill - Council permits a number of alternative backfill materials to be placed in accordance with specifications available from it's Civil Operations Unit.

Backfill Material Requiring Minimal Compaction - No compaction Testing Required.

A. Single Sized Aggregate 5mm or 10mm

B. Flowable Fill (0.5 - 2.0 MPa.) Delivered in Concrete agitator trucks

Backfill Material Requiring Compaction and Compaction Testing - Testing Fee payable

A. Stabilised Sand- Compacted in 300mm layers to 95% Standard Compaction

B. Single Sized sand - Compacted in 600mm lifts to 95% Standard Compaction

C. Fine Crushed rock - Compacted in 150 mm layers 95% Standard Compaction
