ADDITIONAL INFORMATION

A application for a Domestic Greywater Treatment System shall be accompanied by the following information:

- A site plan, to scale, showing the location of the Domestic Greywater Treatment System (including tanks, trenches, absorption and irrigation application areas, pipe-work and fixtures) and any buildings, facilities and any environmentally sensitive areas within 100m of the system or application area. The plan is also to show the location of any dwellings or outbuildings on adjacent land to the site.
- Details of the climate, geology, topography, soil composition and vegetation of any effluent application areas related to the Domestic Greywater Treatment System and an assessment of the site in light of those details.
- Full specifications of the Domestic Greywater Treatment System.
- Evidence from the Department of Health that the facility proposed is to be installed to a design or plan that is subject to a current certificate of accreditation issued by the Director – General of the Department of Health.
- Details of the operation and maintenance requirements for the proposed system.
- Details of the proposed operation, maintenance and servicing arrangements intended to meet the above requirements.
- The action to be taken in the event of a breakdown or other interference with its operation.
- Details of any other factors relevant to the capacity of the facility.

NB Failure to provide the information required by this application may result in Council being unable to properly assess your proposal and delay the approval process.
