# PAPER PRESS & PRINT PATTERNS

---

**Here is what you need:**

- Bubble wrap, plastic junk, lids, pegs, rubbers
- Texta
- Scissors
- Plain paper

**The pattern in the middle is an old card I found just to give me an idea**

**Your texta pens will not stick or absorb into plastic so colour onto the plastic and when you press down your object, the pattern is printed onto the paper.**

**Bubble wrap works really well... you can draw patterns onto the wrap and press them onto the paper.**

**You can cut the wrap into any shape you want.**

**You can over print colours to create different colours.**

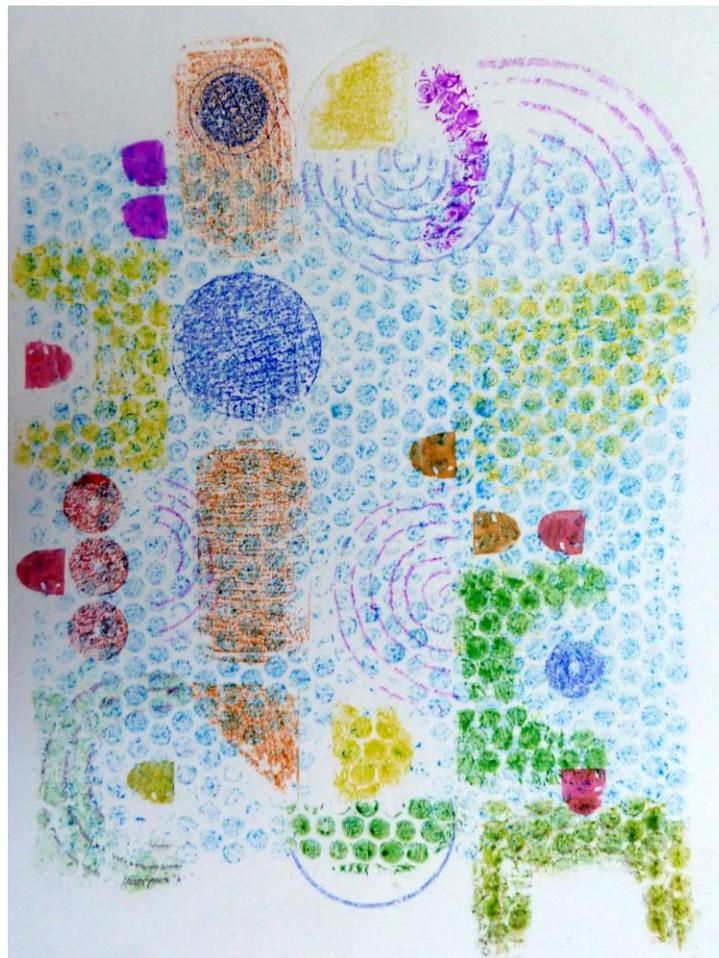

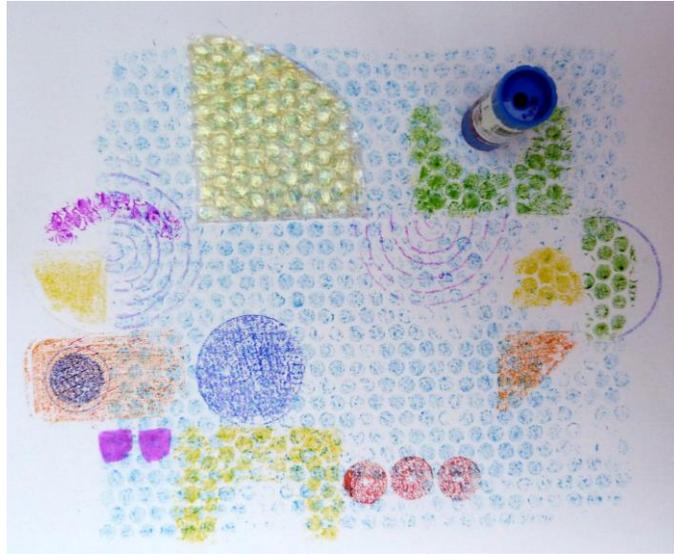

**Use your textures to colour over the plastic junk and then press it down onto your paper.**

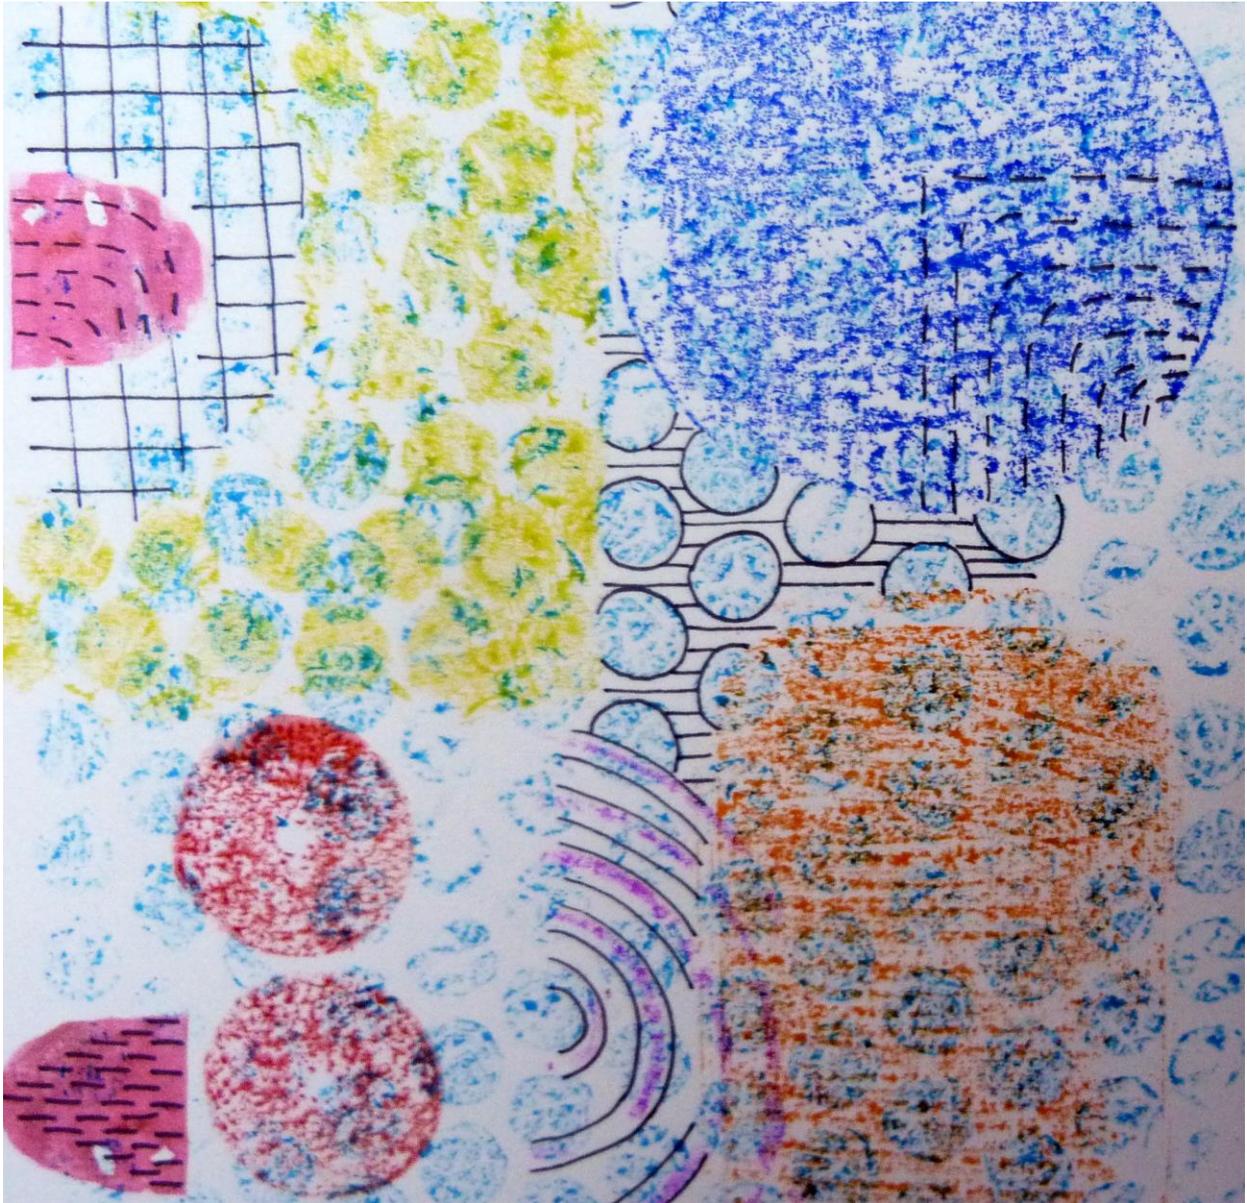

**I coloured over a big piece of bubble wrap to make a background.**

**Then I started adding bits and pieces of cut out plastic and bubble wrap, looking now and again at the reference pattern.**

Here is the finished pressing.

**You can add some fine line patterns to finish off the piece.**

**I used black fine liner but you can add colour.**

**You can then press more patterns and add more colour!**

**You can also use trees, plants and flowers to inspire your work.**

**I cut a fancy frame to put around my work and I added some details with a fine liner pen.**

**You can keep adding and adding and adding and adding!**
